SUMMARY

Backend-focused Software Engineer with 4+ years building enterprise-grade systems in .NET and NestJS. Specialize in reporting engines, modernizing legacy architectures, and Oracle-to-PostgreSQL data pipelines using Clean Architecture, DDD and CQRS. Progressed from Junior engineer to Software Engineer II — now architecting platforms and leading cloud migrations on containerized AWS infrastructure.

EXPERIENCE

Innospace Infotech Ltd

Dhaka, Bangladesh

Oct 2023 – Present

Software Engineer II

Jan 2026 – Present

NestJS • TypeScript • PostgreSQL • Oracle • AWS • Docker

- Architected an enterprise BI reporting engine on NestJS with Clean Architecture, DDD and CQRS — decoupled Domain, Application, Infrastructure and API layers built for maintainability and Power BI integration.
- Built a near-real-time Change Data Capture (CDC) engine syncing a legacy Oracle 11g database to PostgreSQL within seconds — transaction-level consistency with automatic reconnection and retry/recovery.
- Led an Oracle 11g → PostgreSQL bulk-migration pipeline on AWS (EC2, Lambda, S3), containerized with Docker.
- Migrated legacy applications to modern frameworks and cloud infrastructure; optimized IIS deployments for production reliability.

Software Engineer

Jan 2025 – Dec 2025

ASP.NET Core • C# • CQRS • PostgreSQL • Docker

- Designed and built RESTful APIs in ASP.NET Core, streamlining internal business workflows and system integrations.
- Designed a field-force tracking platform (Modular Monolith + CQRS) secured with JWT access/refresh rotation and role-based access control (RBAC).
- Containerized development and deployment with Docker and Docker Compose for consistent, reproducible environments.

Junior Software Engineer

Oct 2023 – Dec 2024

ASP.NET • Oracle • Flutter • jQuery

- Developed and maintained core ERP solutions (sales-force tracking and in-house ERP), improving key business processes.
- Built a cross-platform mobile application in Flutter with a responsive, intuitive UI across platforms.

Tawoon Software Solution

Dhaka, Bangladesh

Nov 2022 – Jun 2023

Junior Software Developer

.NET Core • Jenkins • RabbitMQ • Amazon S3

- Built and maintained ERP systems for multiple clients using .NET Core RESTful APIs.
- Implemented Jenkins CI/CD pipelines; integrated RabbitMQ messaging and Amazon S3 storage.

SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Backend: ASP.NET Core, .NET Framework, NestJS, RESTful APIs

Architecture: Clean Architecture, DDD, CQRS, Modular Monolith, System Design

Data & ORM: PostgreSQL, Oracle, SQL Server, EF Core, Dapper, TypeORM

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD, IIS

Messaging & Mobile: RabbitMQ, Flutter

EDUCATION

B.Tech in Computer Science & Engineering — Kurukshetra University, India

Jun 2019 – Jul 2023

CGPA: 8.19 / 10

CERTIFICATIONS

Foundational C# with Microsoft — freeCodeCamp (2024)

Web Development Bootcamp — Udemy (2022)
